out by an intermediary

A selection of health institutions and services

Database recruitment is carried
out as part of an interventional
study

No

Additional information regarding
sample selection.

Prospective. Inclusion cut-off date: 01/06/2005.

Database objective

Main objective

To assess the cost of automatic implantable
defibrillator usage in France. Secondary objective: -
Complications associated with automatic
implantable defibrillators; - To investigate cause-
specific mortality in patients with automatic
implantable defibrillators; - The psychological impact
of automatic implantable defibrillators; - Incidence of
appropriate and inappropriate therapies.

Inclusion criteria

All patients who received an automatic implantable
defibrillator

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	22 centres throughout France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	06/2003
Date of last collection (YYYY or MM/YYYY)	2005
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2418
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality
Procedures	
Data collection method	- Self-administered questionnaire: manual input

from a paper questionnaire. - Interviews: input from a paper questionnaire. - Clinical examinations: handwritten. - Biological analysis: handwritten.

Participant monitoring	Yes
Details on monitoring of participants	Every 2 years
Links to administrative sources	No
