

ANRS CO01/CO11 - Prospective Multicentric Study on Maternal-Foetal Translation of HIV-1 and/or HIV-2 and Prevention

Head :Warszawski Josiane, Unité de recherche U.822

Last update : 08/13/2014 | Version : 2 | ID : 6530

General

Identification

Detailed name Prospective Multicentric Study on Maternal-Foetal Translation of HIV-1 and/or HIV-2 and Prevention

Sign or acronym ANRS CO01/CO11

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Accord CNIL

General Aspects

Medical area Hematology
Immunology
Infectious diseases

Health determinants Addictions
Social and psychosocial factors

Keywords Mother-child transmission, pregnancy, infection, incidence, risk factors

Scientific investigator(s) (Contact)

Name of the director Warszawski

Surname Josiane

Address 82, rue du Général Leclerc 94276 Le Kremlin-Bicêtre

Phone +33 (0)1 45 21 22 86

Email josiane.warszawski@inserm.fr

Unit Unité de recherche U.822

Organization Institut National de la Santé et de la Recherche Médicale, Agence Nationale de Recherches sur le Sida

Collaborations	
Funding	
Funding status	Public
Details	Agence Nationale de Recherches sur le Sida
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Agence Nationale de Recherches sur le Sida
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Enrolment began in October 2004 in CO11 in order to complete C01.
Database objective	
Main objective	To determine the progression and transmission of HIV from mother to child.
Inclusion criteria	- Women - adult - pregnant - infected with HIV-1 and/or HIV-2 - pregnancy follow-up and birth scheduled in a French Perinatal Survey maternity hospital
Population type	

Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Woman
Geography area	National
Detail of the geography area	France (10 sites in Paris, 10 sites in the Paris region an 8 sites in the Province)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1985
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2084
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Biological data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Biological data (detail)	Triplicate sample
Presence of a biobank	Yes
Contents of biobank	Whole blood Plasma
Details of biobank content	aliquots
Health parameters studied	Health event/morbidity

Procedures

Participant monitoring	Yes
Details on monitoring of participants	Follow-up of mother by obstetrician/gynaecologist Follow-up of child for 2 years
Links to administrative sources	No

Promotion and access
