études

Name of the director Vanderschelden

Surname	Mélanie
Address	18 boulevard Adolphe Pinard 75675 Paris cedex 14
Phone	+ 33 (0)1 41 17 50 50
Email	melanie.vanderschelden@insee.fr
Organization	INSEE - Institut national de la statistique et des études
Collaborations	
Funding	
Funding status	Public
Details	INSEE
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSEE - Institut national de la statistique et des études économiques
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The survey is part of the series of Family surveys and the Study of Family History (1999). The sample for Family and Housing survey is a sample from the housing inventory at the annual census survey in 2011. A sample of municipalities was first made from municipalities from the census in 2011. Then within these municipalities, a sub-sample of geographic areas was established. Finally, within

these geographic areas, all adults of one gender were investigated: all adult males were surveyed in one-third of the sectors, and all adult women in two-thirds of the remaining sectors. As in the past, the over-weighting of women allows updates to detailed analysis on fertility.

Database objective

Main objective

Associated with the population census since 1954, the "Family" survey supplements the collection of demographic information in France (census and vital statistics). Its primary objective is to monitor the development of new family types through a retrospective questionnaire and biographical rebuilding the demographic history for generations. Each edition of this survey devotes a battery of questions to the study of a particular topic (female activity in 1982, child care in 1990, transmission of languages ??and dialects in 1999). Until the 1990 edition, the Family Survey was reserved for women (originally married women between 45 and 54 years old), then married women at least 65 years old and all women aged 18 to 64 years old, then men in prisons.

Inclusion criteria

Individuals aged 18 years old and over on 1st January 1999 living in metropolitan France.

Population type

Age

Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered

General population

Gender

Male
Woman

Geography area

National

Detail of the geography area

Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

1975

Size of the database

Size of the database (number of individuals) Greater than 20 000 individuals

Details of the number of individuals 359 770: - ~121 000 hommes/men - ~238 000 femmes/women

Data

Database activity Data collection completed

Type of data collected Declarative data

Declarative data (detail) Paper self-questionnaire
Face to face interview

Presence of a biobank No

Health parameters studied Health event/mortality
Quality of life/health perception

Procedures

Data collection method The collection is done by deposit-withdrawal of a four-page questionnaire for persons falling within the scope of the investigation. The questionnaires were hand delivered by enumerators along with the usual documents (Census Form, sheet housing, individual forms). They were recovered under the same conditions.

Participant monitoring No

Links to administrative sources Yes

Linked administrative sources (detail) During population census in March 1999.
