Participation in projects, networks and consortia	Yes

Funding

Funding status	Private
Details	INSTITUTIONS DE RETRAITE COMPLÉMENTAIRE SOUS LA TUTELLE DE L'AGIRC ET DE L'ARRCO

Governance of the database

Sponsor(s) or organisation(s) responsible	CHU Montpellier
Organisation status	Public

Additional contact

Main features

Type of database

Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at group level (clusters)
Additional information regarding sample selection.	Prospective Other bodies active in creating this cohort: AGIRC-ARROC PREVENTION CENTRES

Database objective

Main objective	General objective: to measure the impact of prevention assessments and subsequent recommendations from a medical, psychological, and social perspective on health and quality of life (carried out in AGIRC-ARRCO Prevention Centres). Secondary objectives: Objectives are two-fold: - in-depth study: 1 - to improve the sharing of knowledge between different assessment specialists through computerised questionnaires; 2 - to implement a specific evaluation to identify predictive frailty factors in a sub-group of 75 years and over. - board study 1 - to evaluate participating volunteers' interest and need for new technologies to ensure quality of life at home; 2 - to welcome external research projects from other structures.
Inclusion criteria	Following invitation, participation is on a voluntary basis. Mailing is carried out on submission of retirement file by social services from supplementary retirement institutions.

Population type

Age	Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Gender	Male Woman

Geography area	National
Detail of the geography area	Multicentric cohort throughout France (10 centres) - Grenoble, Lyon, Marseilles, Paris*2, Rouen, Toulouse, Troyes, Valence and certain centres with local regional offices

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	01/2010

Size of the database

Size of the database (number of individuals)	[10 000-20 000[individuals
Details of the number of individuals	10000 sujets de plus de 55 ans/ more than 55 years (étude modification du comportement et conséquences) ; 1000 sujets de 75 ans / more than 75 years (groupe fragilité)

Data

Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Paraclinical data Biological data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Paper self-questionnaire Face to face interview
Paraclinical data (detail)	Weight, height, waist circumference
Biological data (detail)	Type of samples taken: biological analysis is carried out in partnership with health insurance health examination centres (CES)
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Quality of life/health perception

Procedures

Data collection method	Self-administered questionnaire: Direct input Interview: Direct input Clinical examination: Direct input Biological analysis: Direct input
Participant monitoring	Yes
Details on monitoring of participants	(Indefinite duration)
Links to administrative sources	Yes
Linked administrative sources (detail)	Database(s) used: Other health insurance databases

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)	Data may be used by academic teams: temporary access depending on field Data may be used by industrial teams: contractual access
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
