Unit EA 4069 Evaluation et politiques de santé - PRES Sorbonne Paris CitéCentre de tabacologie

Organization APHP

Collaborations	
Funding	
Funding status	Mixed
Details	French Institute for Prevention and Health Education (INPES), National Cancer Institute (Inca), Gilbert Lagrue Foundation
Governance of the database	
Sponsor(s) or organisation(s) responsible	AP-HP
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	No subject selection
Database objective	
Main objective	Collection of data on the characteristics of smokers making smoking addiction appointments.
Inclusion criteria	Smokers attending smoking addiction appointments and participating in the national CDTnet electronic appointment database.
Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)

Elderly (65 to 79 years)
Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2001
Date of last collection (YYYY or MM/YYYY)	2012
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	177,000 (01/12/2012)
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Biological data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire Face to face interview
Biological data (detail)	Exhaled carbon monoxide (CO)
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption

Procedures	
Data collection method	Online: each center enters its data with an identification number and password and sends this data digitally to Dr. LeFaou's server.
Participant monitoring	Yes
Details on monitoring of participants	Depending on smoking addiction appointment usage.
Links to administrative sources	No
Promotion and access
