Date of first collection (YYYY or MM/YYYY) 1980

## Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 4,000

## Data

Database activity Data collection completed

Type of data collected  
Clinical data  
Declarative data  
Paraclinical data  
Biological data

Clinical data (detail) Direct physical measures  
Medical registration

Details of collected clinical data Clinical examination at baseline.

Declarative data (detail) Paper self-questionnaire

Details of collected declarative data Self-administered questionnaire and interview questionnaire at baseline.

Paraclinical data (detail) Anthropomorphic data.

Biological data (detail) Blood sample.

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health event/mortality

## Procedures

Data collection method Self-administered questionnaire from a paper questionnaire with double-data entry - interview: from a paper questionnaire with double data entry - clinical examinations: handwritten with double-data entry - biological analysis: handwritten with double-data entry.

Quality procedure(s) used Consistency request after electronic data is recorded. Missing data is managed by returning to source record. Patients are informed about the use of their data.
