Last update : 06/23/2016 | Version : 1 | ID : 73204

General	
Identification	
Detailed name	Cohort of Patients Admitted to Hospital Following Suicide Attempt
Sign or acronym	REPEATERS
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CCTIRS, CNIL (agreement 911143 v.0)
General Aspects	
Medical area	Psychology and psychiatry
Pathology (details)	Suicide
Health determinants	Healthcare system and access to health care services Lifestyle and behavior
Keywords	long-term outcome, follow-up, recurrence, suicide attempt, adolescent
Scientific investigator(s) (Contact)	
Name of the director	Ligier
Surname	Fabienne
Email	fabienne.ligier@cpn-laxou.com
Unit	EA 4360 APEMAC, Nancy
Organization	Nancy University Hospital
Name of the director	Guillemin

Surname	Francis
Phone	+33 (0)3 83 85 21 63
Email	francis.guillemine@chu-nancy.fr
Unit	EA 4360 APEMAC, Nancy - INSERM CIC-EC 1433
Organization	Nancy University Hospital
Name of the director	Kabuth
Surname	Bernard
Phone	+ 33 (0)383154553
Email	bernard.kabuth@cpn-laxou.com
Organization	Nancy-Laxou Psychotherapeutic Centre
Collaborations	
Funding	
Funding status	Public
Details	Inserm, Nancy University Hospital
Governance of the database	
Sponsor(s) or organisation(s) responsible	Nancy University Hospital
Organisation status	Public
Presence of scientific or steering committees	No
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is made	Another treatment or procedure

on the basis of:

Database recruitment is carried out as part of an interventional study	No
--	----

Database objective

Main objective	The aim of this study is to observe adolescent behaviour following a suicide attempt. This study shall determine and observe whether being lost to contact by medical staff the year following suicide attempt increases the risk of recurrence in adolescents (REPEATERS study) within 10 years of baseline suicide attempt.
----------------	---

Inclusion criteria	Adolescents (aged 13-18) admitted to hospital following a suicide attempt between 1994 and 2000 at Nancy University Children's Hospital to study the impact of being lost to contact.
--------------------	---

Population type

Age	Adolescence (13 to 18 years)
-----	------------------------------

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	Local
----------------	-------

French regions covered by the database	Alsace Champagne-Ardenne Lorraine
--	-----------------------------------

Detail of the geography area	Nancy
------------------------------	-------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	1994
--	------

Date of last collection (YYYY or MM/YYYY)	2010
---	------

Size of the database

Size of the database (number of individuals)	< 500 individuals
--	-------------------

Data

Database activity	Current data collection
-------------------	-------------------------

Type of data collected	Clinical data Declarative data
------------------------	-----------------------------------

Clinical data (detail)	Direct physical measures
------------------------	--------------------------

Details of collected clinical data	Suicide attempt index; personal and family details were gathered from adolescent medical records: personal characteristics (sex, age, history of suicide attempts [yes/no]; psychiatric comorbidity [yes/no] according to classification; academic difficulties [yes/no] and family characteristics (marital relationship [separated or not]; employment status of each working parent [or not]; family history of suicide [yes/no] and parent alcohol dependence [yes/no]; details on length of hospitalisation; psychiatric follow-up [yes/no]; recurrence of suicide attempts throughout the year [early SA recurrence [yes/no]] and LCE (lost to contact early) status [yes/no].
------------------------------------	--

Declarative data (detail)	Paper self-questionnaire
---------------------------	--------------------------

Details of collected declarative data	A self-administered questionnaire was sent to patient to assess recurrence.
---------------------------------------	---

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health event/morbidity Health care consumption and services
---------------------------	--

Care consumption (detail)	Hospitalization Medical/paramedical consultation
---------------------------	---

Procedures

Participant monitoring	Yes
------------------------	-----

Details on monitoring of participants	10-year follow-up after enrolment in the study.
---------------------------------------	---

Links to administrative sources	No
---------------------------------	----
