

- Cross-sectional study of the relationships between energy insecurity and health (Hérault)

Head : Ledesert Bernard
GAZAIX Laura

Last update : 10/19/2017 | Version : 1 | ID : 73131

General

Identification

Detailed name	Cross-sectional study of the relationships between energy insecurity and health (Hérault)
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL

General Aspects

Medical area	General practice
Health determinants	Lifestyle and behavior Social and psychosocial factors
Keywords	heating, herault, thermal insulation, poor housing, disadvantaged population, habitat, health behaviour, state of health

Scientific investigator(s) (Contact)

Name of the director	Ledesert
Surname	Bernard
Phone	+33 (0)4 67 69 25 03
Email	bernard.ledesert@ors-lr.org
Organization	CREAI-ORS LR
Name of the director	GAZAIX
Surname	Laura
Phone	+33 (0)4 67 13 80 94
Email	laura.gazaix@gefosat.org

Organization	GEFOSAT
Collaborations	
Participation in projects, networks and consortia	Yes
Details	The Abbé Pierre foundation requested a research project on this topic from CREA-ORS LR and GEFOSAT
Funding	
Funding status	Public
Details	Languedoc-Roussillon regional health agency, Languedoc-Roussillon EDEME, Languedoc-Roussillon Region
Governance of the database	
Sponsor(s) or organisation(s) responsible	CREAI-ORS LR
Organisation status	Public
Sponsor(s) or organisation(s) responsible	GEFOSAT
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	An administrative base or a register
Base or register (detail)	"Exposed" households were those receiving an expert assessment in 2011-2012 as part of the FATMEE programme (households surveyed by the departmental solidarity agencies and by CCAS)
Database recruitment is carried out as part of an interventional	Yes

study

Details	Performed at group level (clusters)
Database objective	
Main objective	<p>The purpose of the study is to describe the effects of energy insecurity on health and to identify how this particular form of precarity is an aggravating factor for the health condition of individuals facing it.</p>
Inclusion criteria	<p>For the households surveyed by the departmental solidarity agencies:</p> <ul style="list-style-type: none">· "exposed" households were those receiving an expert assessment in 2011-2012 as part of the FATMEE program. In each Departmental Solidarity Agency, a joint commission combining the project partners convenes every month in order to rule on the appeals to the FATMEE program; situations are presented by a referring social worker, who has conducted a first in-home visit following a request for assistance, as mentioned above (unpaid energy bills, outage, inability to heat, etc.);· "unexposed" households were selected by a referring social worker at the level of each Departmental Solidarity Agency: for every "exposed" household included in the study, action was taken to find among the households requesting aid from departmental social services in the same territory (city or canton) another household without a proven energy insecurity problem that presented similar characteristics in terms of family structure (elderly person alone, family with two parents and two young children, single-parent family with young children, etc.). The fact of not experiencing energy insecurity was determined by a negative response to two questions: is it too cold in your household? have you had difficulties paying your energy bills over the last 12 months? <p>For households surveyed in the CCAS territory:</p> <ul style="list-style-type: none">· "exposed" households were those that will receive an expert assessment under the FATMEE program. The determination of these households was made jointly by the CCAS and the GEFOSAT as part of a commission operating on the same principles as those of the departmental solidarity agencies;- "unexposed" households were selected by a social worker based on the same principle as for the households monitored by social workers from the departmental solidarity agencies.

Population type	
Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Departmental
French regions covered by the database	Languedoc-Roussillon Midi-Pyrénées
Detail of the geography area	Hérault
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2012
Date of last collection (YYYY or MM/YYYY)	2013
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	356
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire

	Face to face interview
Details of collected declarative data	Housing questionnaire (the housing situation, the person responding, the residents of the household, the characteristics of the housing, the assessment of heating), Resident questionnaire (characteristics of the person, social coverage and forfeiture of care, perceived health condition, chronic disease, symptoms and health problems over the course of the last 12 months, health behaviours, assessment of housing)
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception
Procedures	
Quality procedure(s) used	The "resident" questionnaire was prepared by CREAI-ORS LR, specifically built upon the questionnaires used within the LARES (Large Analysis and Review of European housing and health Status) study conducted by the European office of the WHO
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	<u>2013 Rapport Précarité énergétique et santé dans l'Hérault, avril 2013.pdf</u>
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
