

# DECLIC - Diagnostic Et Critères des dorso-Lombalgies Chroniques

Head :Thibout Emmanuel

Last update : 04/02/2012 | Version : 1 | ID : 107

## General

### Identification

|               |                                                        |
|---------------|--------------------------------------------------------|
| Detailed name | Diagnostic Et Critères des dorso-Lombalgies Chroniques |
|---------------|--------------------------------------------------------|

|                 |        |
|-----------------|--------|
| Sign or acronym | DECLIC |
|-----------------|--------|

|                                                                                                                          |                 |
|--------------------------------------------------------------------------------------------------------------------------|-----------------|
| CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation | CNIL n° 1404666 |
|--------------------------------------------------------------------------------------------------------------------------|-----------------|

### General Aspects

|              |              |
|--------------|--------------|
| Medical area | Rheumatology |
|--------------|--------------|

|                     |            |
|---------------------|------------|
| Health determinants | Occupation |
|---------------------|------------|

|                  |                       |
|------------------|-----------------------|
| Others (details) | Chronic low back pain |
|------------------|-----------------------|

|          |                                     |
|----------|-------------------------------------|
| Keywords | ASAS criteria, liberal rheumatology |
|----------|-------------------------------------|

### Scientific investigator(s) (Contact)

| Organisation status                                                    | Private                                                                                                                                                                    |
| Additional contact                                                     |                                                                                                                                                                            |
| Main features                                                          |                                                                                                                                                                            |
| Type of database                                                       |                                                                                                                                                                            |
| Type of database                                                       | Study databases                                                                                                                                                            |
| Study databases (details)                                              | Not-repeated cross-sectional studies (except case control studies)                                                                                                         |
| Database recruitment is carried out by an intermediary                 | A selection of health care professionals                                                                                                                                   |
| Database recruitment is carried out as part of an interventional study | No                                                                                                                                                                         |
| Additional information regarding sample selection.                     | 500 randomly-drawn rheumatologists and including the first 4 patients examined in consultation that meet the inclusion criteria                                            |
| Database objective                                                     |                                                                                                                                                                            |
| Main objective                                                         | Evaluate the performance of the ASAS criteria at the time of the diagnosis retained by the physician for the chronic low back pain in French liberal rheumatology practice |
| Inclusion criteria                                                     | Patients with or having an antecedent of chronic low back pain (>3 months) that began before the age of 45 years                                                           |
| Population type                                                        |                                                                                                                                                                            |
| Age                                                                    | Adulthood (19 to 24 years)<br>Adulthood (25 to 44 years)<br>Adulthood (45 to 64 years)                                                                                     |
| Population covered                                                     | Sick population                                                                                                                                                            |
| Gender                                                                 | Woman                                                                                                                                                                      |
| Geography area                                                         | National                                                                                                                                                                   |
| Detail of the geography area                                           | National                                                                                                                                                                   |

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 2010

Date of last collection (YYYY or MM/YYYY) 2011

### Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 2000

### Data

Database activity Data collection completed

Type of data collected  
Clinical data  
Paraclinical data  
Biological data  
Administrative data

Clinical data (detail) Direct physical measures

Paraclinical data (detail) radiological sacroiliitis

Biological data (detail) CRP, HLA B27 antigen

Administrative data (detail) socio-demographic data

Presence of a biobank No

Health parameters studied Health event/morbidity

### Procedures

Classifications used CIM 10

Participant monitoring No

Links to administrative sources No
