

MULTI-MA - Longitudinal Study on Patients with Alzheimer's Disease

Head :Dubois Bruno, Centres de Mémoire de Ressources et de Recherche (CMRR) Hôpital de la Pitié-Salpêtrière

Last update : 05/12/2015 | Version : 1 | ID : 8031

General

Identification

Detailed name	Longitudinal Study on Patients with Alzheimer's Disease
---------------	---

Sign or acronym	MULTI-MA
-----------------	----------

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
--	------

General Aspects

Medical area	Geriatrics Neurology
--------------	-------------------------

Health determinants	Social and psychosocial factors
---------------------	---------------------------------

Keywords	donation, brain, research
----------	---------------------------

Scientific investigator(s) (Contact)

Name of the director	Dubois
----------------------	--------

Surname	Bruno
---------	-------

Address	47-83 boulevard de l'Hôpital 75651 Paris Cedex 13
---------	---

Phone	+33 (0)1 42 17 75 02
-------	----------------------

Email	bruno.dubois@psl.aphp.fr
-------	--------------------------

Unit	Centres de Mémoire de Ressources et de Recherche (CMRR) Hôpital de la Pitié-Salpêtrière
------	---

Organization	Assistance Publique - Hôpitaux de Paris
--------------	---

Collaborations

Funding	
Funding status	Private
Details	The French Alzheimer's Research Foundation
Governance of the database	
Sponsor(s) or organisation(s) responsible	Assistance Publique - Hôpitaux de Paris AP-HP
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Patients who gave consent to being monitored until their death and agreed to donate their brain for research.
Database objective	
Main objective	To create a tissue bank and a brain bank that can be used for research purposes.
Inclusion criteria	- male or female - under 60 years old
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman

Geography area	National
Detail of the geography area	Six French Memory Resource and Research Centres (Bordeaux, Marseille, Montpellier, Nice, Paris and Toulouse)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2005
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	335
Data	
Database activity	Current data collection
Type of data collected	Clinical data Administrative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Medical-social record
Administrative data (detail)	Medical-social record
Presence of a biobank	Yes
Contents of biobank	Tissues
Details of biobank content	Tissue and brain
Health parameters studied	Quality of life/health perception
Procedures	
Participant monitoring	Yes
Links to administrative sources	No
Promotion and access	
Promotion	

Access

Terms of data access (charter for data provision, format of data, availability delay)

Contact the scientist in charge.

Access to aggregated data

Access on specific project only

Access to individual data

Access on specific project only
