

# MDO - Monitoring of Obligatory Notifiable Diseases (Infectious Diseases)

Head :Coignard Bruno

Last update : 05/13/2015 | Version : 1 | ID : 8398

## General

### Identification

Detailed name Monitoring of Obligatory Notifiable Diseases (Infectious Diseases)

Sign or acronym MDO

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL : 902305

### General Aspects

Medical area Biology  
Infectious diseases

Keywords MDO, DO, monitoring

### Scientific investigator(s) (Contact)

Name of the director Coignard

Surname Bruno

Address 12 Rue du Val d'Osne, 94415 Saint-Maurice France

Email DMI@invs.sante.fr

Organization Institut de veille

### Collaborations

Participation in projects, networks and consortia Yes

Details Regular publication in Weekly Epidemiological Bulletin (BEH)

### Funding

Funding status	Public
Details	INVS
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	InVS
Organisation status	Public
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Morbidity registers
Additional information regarding sample selection.	Cases of obligatory notifiable diseases diagnosed by a healthcare professional.
<b>Database objective</b>	
Main objective	This national system is based on the legal obligation of all healthcare professionals (physician or biologist), regardless if they are practising publicly or privately, to report cases of diagnosed diseases to the healthcare authorities as soon as the disease is recorded on the list of obligatory notifiable diseases.
Inclusion criteria	Cases of obligatory notifiable diseases diagnosed by a healthcare professional; the following obligatory notifiable diseases: Botulism, Brucellosis, Anthrax, Chikungunya, Cholera, Dengue Fever, Diphtheria, African Haemorrhagic Fevers, Yellow Fever, Typhoid and Paratyphoid Fevers, Acute Hepatitis A, Acute Symptomatic Hepatitis B Infection, HIV Infection (regardless of stage), Invasive Meningococcal Disease, Legionnaires' Disease, Listeriosis, Orthopoxvirus including Smallpox, Indigenous Malaria, Imported Malaria from Overseas Départements, Plague, Poliomyelitis, Rabies, Suspected Creutzfeldt-Jakob Disease and other Human Transmissible Spongiform Encephalopathies, Tetanus, Collective Food Poisoning, Tuberculosis, Tularaemia and Typhus.
<b>Population type</b>	
Age	Newborns (birth to 28 days) Infant (28 days to 2 years)

Early childhood (2 to 5 years)  
Childhood (6 to 13 years)  
Adolescence (13 to 18 years)  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered Sick population

Gender Male  
Woman

Geography area National

Detail of the geography area Throughout the entire French territory

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 1980

### Size of the database

Size of the database (number of individuals) Greater than 20 000 individuals

Details of the number of individuals 260,000 subjects in March 2014.

### Data

Database activity Current data collection

Type of data collected Clinical data  
Biological data

Clinical data (detail) Direct physical measures

Biological data (detail) --

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health event/mortality

### Procedures

Data collection method Cases of obligatory notifiable diseases diagnosed

by a healthcare professional.

Quality procedure(s) used

Control on input, statistical programmes

Participant monitoring

No

Links to administrative sources

No

## Promotion and access

### Promotion
